

# Red Hat Single Sign-On Administration (DO313)

**Duration:** 2 Days

## Course Description:

Red Hat Single Sign-On Administration (DO313) is designed for system administrators who want to install, configure and manage Red Hat Single Sign-On servers for securing applications. Learn about the different ways to authenticate and authorize applications using single sign-on standards like OAuth and OpenID Connect (OIDC). You will also learn how to install and configure Red Hat Single Sign-On on the OpenShift Container Platform.

This course is based on Red Hat Single Sign-On version 7.6.

## Intended Audience:

- System Administrators responsible for administering Red Hat Single Sign-On servers.

## Course Outlines:

### Introduce Red Hat Single Sign-On

- Identify the main components of Red Hat Single Sign-On

### Install and Configure Red Hat Single Sign-On

- Identify the best option for installing and configuring RHSSO depending on the infrastructure

### Authentication and Authorization

- Configure authentication and authorization for applications

### Identity Brokering and User Federation

- Configure RHSSO to secure applications from multiple identity providers by using user federation and social logins

### Red Hat Single Sign-On on OpenShift

- Install and configure Red Hat Single Sign-On on OpenShift
