ISO 27701 Foundation

Duration: 2 Days

Course Description:

The ISO 27701 Foundation course is designed to provide learners with a comprehensive understanding of privacy information management systems (PIMS) in accordance with the ISO/IEC 27701 standard. It is an essential guide for professionals who aim to establish, maintain, or improve a PIMS within their organization. Module 1 introduces the key concepts and principles of PIMS, aligning with ISO/IEC 27701 requirements, and covers the course structure, standards frameworks, and fundamental security and privacy concepts. This foundational knowledge sets the stage for effective PIMS implementation. Module 2 delves into the auditing aspects of a PIMS, discussing audit fundamentals, the influence of emerging trends and technology, evidence and risk-based auditing approaches. The module also prepares learners for the certification exam, ensuring they understand how to assess the effectiveness of a Pashby mastering the content of this course, participants will gain valuable insights into managing and protecting personal data, aligning with the globally recognized IEC 27701 and ISO 27701 standards, and enhancing their professional credibility in the field of information security and privacy.
