

ISO 27701 Lead Auditor

Duration: 5 Days

Course Description:

The ISO 27701 Lead Auditor course is designed to equip learners with the knowledge and skills needed to perform privacy information management system (PIMS) audits. Through the course, participants gain a comprehensive understanding of the ISO/IEC 27701 standard and its application in protecting personal data within an organization. Module 1 introduces the core objectives and structure of the course, standards and regulatory frameworks related to PIMS, the certification process, and fundamental concepts of Information Security and privacy. Module 2 delves into audit principles, the influence of technology on audits, the initiation of the audit process, and preparation for the first stage of auditing. Module 3 covers the practicalities of conducting on-site audit activities, communication protocols, and creating audit test plans. Module 4 focuses on concluding the audit, drafting findings, reviewing audit quality, and evaluating corrective action plans. Finally, Module 5 includes the certification exam to validate the knowledge acquired. By completing the ISO 27701 training, auditors will be well-versed in PIMS privacy information management system audits, ready to enhance data privacy practices within organizations.

Course Prerequisites:

- Basic understanding of privacy principles and data protection regulations.
- Familiarity with management systems, particularly knowledge of the ISO 27001 standard and Information Security Management Systems (ISMS).
- Experience with IT or information security practices is highly beneficial.
- Ability to comprehend reading and writing in the language in which the course is taught.
- Some prior knowledge of auditing principles and the audit process would be advantageous but not mandatory.

These prerequisites are designed to ensure that participants have a foundational understanding that will enable them to fully engage with the course material and benefit from the training.
