Lean IT Leadership

Duration: 3 Days

Prerequisites:

A Lean IT Foundation certificate is required for this course.

Course Description:

This Lean IT Leadership course aims to fill this gap by combining published ideas on leadership, Lean leadership, and leadership with practical experience from Lean IT practitioners. The result is a well-rounded view of Lean leadership within an organization.

This course is ideal for managers and professionals who aspire to lead their organization's transformation into a Lean organization. By providing insights into Lean principles and leadership, this course equips learners with the knowledge and skills needed to effectively lead change within their organization.

Course Objectives:

At the end of this course, you will be able to:

- Understand the concept of Lean Leadership.
- Know the application of Lean Leadership in the IT Context.
- Use the Lean IT Leadership development model.
- Develop yourself towards being a Lean IT leader.

- Help others in developing themselves as Lean IT leaders.
- Align the Vision and Goals of your organization.
- Understand the concept of change in an organization.
- Understand how to take the lead in changing your organization.

Target Audience:

Managers and professionals in (IT) organizations
