

SAFe® Product Owner/ Product Manager (POPM)

Duration: 2 Days

Course Description:

Are you looking to strengthen your understanding of product owner and manager responsibilities in a distributed team setting?

If so, this SAFe® Product Owner and SAFe® Product Manager (POPM) certification course is for you. This course will teach you a customer-centric approach guided by the Scaled Agile Framework®, allowing you to achieve higher-quality outcomes in less time. In addition, you will gain valuable insights on topics like daily PO/PM roles, working with engineering teams and stakeholders, epics/features/stories, and designing/prioritizing/building/testing/delivering products. With this certification, take your Agile Release Train (ART) skills to new heights! Your remote environment awaits.

Course Objectives:

- Articulate the Product Owner and Product Manager role.
- Connect SAFe Lean-Agile principles and values to the PO/ PM roles.
- Decompose Epics into Features and decompose Features into Stories.
- Refine Features into Stories.
- Manage Program and Team backlogs.
- Collaborate with Agile teams in estimating and forecasting work.
- Represent Customer needs in Program Increment Planning.
- Execute the Program Increment and deliver continuous value.

Intended Audience:

- Product Managers, Product Owners, Business Owners, and Business Analysts
- Solution, Program and Portfolio Managers, and Process Leads
- Enterprise, Solution, and System Architects

Course Outlines:

- Becoming a Product Owner/Product Manager in the SAFe enterprise
- Preparing for PI Planning
- Leading PI Planning
- Executing Iterations
- Executing the PI
