

# FortiSASE Administrator

**Duration: 2 Days**

## Course Description:

In In this course, you will learn how to use FortiSASE features, including policy types, endpoint profiles, and security profiles. You will explore FortiSASE deployment, user authentication, use cases, and monitoring. You will also learn how to protect your web traffic and Software-as-a-Service (SaaS) applications using content inspection, such as antivirus, web filtering, application control, and logging.

## Target Audience:

Networking and security professionals involved in the design, administration, and management of FortiSASE-based network deployment should attend this course.

## Prerequisites:

You must have an understanding of the topics covered in the following courses, or have equivalent experience:

- FCP - FortiGate Administrator
- FCP - FortiClient EMS Administrator

## Course Objectives:

- Describe the SASE architecture
- Construct FortiSASE deployment cases
- Identify the SASE components
- Describe the Fortinet SASE solution
- Integrate FortiSASE into a hybrid network
- Describe the different FortiSASE solutions
- Describe different authentication methods on FortiSASE
- Configure zero trust network access (ZTNA) with FortiSASE
- Configure security profile groups and security components
- Configure different types of FortiSASE policies
- Deploy supported FortiSASE use cases
- Configure FortiView monitors
- Configure and generate reports
- Configure dashboards

## Course Outlines:

- Deployment
- User Onboarding and Additional Features
- SIA and SSA
- Security and Endpoint Profiles
- Secure Private Access
- Monitoring and Troubleshooting
