ISO/IEC 27701:2019 Lead Auditor Training

Duration: 3 Days

Course Description:

Auditing is crucial to the success of any Privacy Information Management System (PIMS). As a result, it carries with it, heavy responsibilities, tough challenges, and complex problems. This three-day intensive course equips Information Security Management System auditors to plan, manage and implement a privacy management audit for their organization. It also empowers professionals who are working towards certification and provides the knowledge and skill required to carry out audits of privacy controls and principles by your organization or those implemented by suppliers and subcontractors.

Target Audience:

This course is suitable for:

- those who are already qualified as lead auditors in information security (ISO 27001) and want to conduct audits for Privacy Management in accordance with ISO 27701:2019,
- Those wishing to learn about effective audit practices for privacy, and are aware of information security management based on ISO 27001 and privacy management based on ISO 27701, and
- 3.Consultants who wish to provide advice on ISO 27701 based PIMS.

Course Objectives:

Effective auditing helps to ensure that the measures you put in place to protect your organization, and your customers are properly managed and achieve the desired result.

Course Outlines:

- ➢ Privacy Information Management System (PIMS) principles
- ➢ Management system audit of privacy controls based on ISO 27701
- ➢ Third-party certification
