

ISO/IEC 42001:2023 Requirements Training

Duration: 1 Day

Course Description:

In today's fast paced environment, artificial intelligence is playing a greater role in both our personal and professional lives. AI can help position your place in the market, but there is a need to ensure this is done responsibly. Having an internationally recognized Artificial Intelligence Management System (AIMS) allows you to enhance organizational performance and gain a competitive edge when using AI.

Identify the structure and requirements of an effective AIMS and what this means for you. Gain a thorough understanding of the history and development of ISO/IEC 42001:2023, key terms, definitions and the ISO harmonized structure. You'll learn to interpret and apply the key concepts and principles of the standard to existing processes within your organization.

Target Audience:

Anyone involved in the implementation auditing, maintaining or supervising of an ISO/IEC 42001 AIMS.

Prerequisites:

There are no formal prerequisites, however it will be useful for delegates to read the standard before attending the course. An understanding of ISO/IEC 22989, Artificial Intelligence Concepts and Terminology would be beneficial.

Course Objectives:

This course will help you:

- Identify the key requirements and benefits of ISO/IEC 42001:2023
- Manage your requirements for AI systems and drive continual improvement
- Take steps to ensure that the AIMS is used as a core set of processes in your organization
- Attract and retain customers by meeting their current and future needs better

Course Outlines:

- Explain the history and development of ISO/IEC 42001
- > Describe what an AIMS is
- > Identify the benefits of an AIMS
- > Recognize the terms and definitions used
- Identify key concepts, principles and structure
- Identify the main requirements of ISO/IEC 42001
