

Panorama: Centralized Network Security Administration

Duration: 2 Days

Course Description:

The Palo Alto Networks Panorama: Centralized Network Security Administration course is a training that should help you learn how to configure and manage the next-generation Panorama management server, gain experience configuring templates (including template variables) and device groups and activate, configure, and manage Prisma Access using Panorama.

Target Audience:

- Security Administrators
- Security Operations Specialists
- Security Analysts

Prerequisites:

- Participants should complete the Firewall: Configuration and Management class.
- Participants must be familiar with Palo Alto Networks next-generation firewall management and basic networking concepts, including routing and IP addressing.

Course Objectives:

This course should help students gain experience configuring and managing Palo Alto Networks Panorama management servers. Administrators that complete this course should become familiar with the Panorama management server's role in managing and securing the overall network.

Course Outlines:

- Initial Configuration
- Adding Firewalls
- Templates
- Device Groups
- Prisma Access Overview
- Activate and Configure
- Templates and Device Groups
- Configure Service Connections
- Secure Remote Networks
