

Panorama: NGFW Management

Duration: 2 Days

Course Description:

The Palo Alto Networks Panorama: NGFW Management course is a training that should help you to learn how to configure and manage the next-generation Panorama management server, gain experience configuring templates (including template variables) and device group, gain experience with administration, log collection, and logging and reporting and become familiar with planning and design considerations for Panorama deployment

Target Audience:

- Security Administrators
- Security Operations Specialists
- Security Analysts
- Security engineers and architects

Prerequisites:

- Participants should complete the Firewall: Configuration and Management class.
- Participants must be familiar with Palo Alto Networks next-generation firewall management and basic networking concepts, including routing and IP addressing.

Course Objectives:

This course should help students gain in-depth knowledge about configuring and managing a Palo Alto Networks Panorama management server. Administrators that complete this course should become familiar with the Panorama management server's role in managing and securing the overall network. Network professionals will be shown how to use Panorama aggregated reporting to provide them with a holistic view of a network of Palo Alto Networks next generation firewalls.

Course Outlines:

- Initial Configuration
- Adding Firewalls
- Templates
- Device Groups
- Log Collection and Forwarding
- Using Panorama Logs
- Panorama Administrative Accounts
- Reporting
- Troubleshooting
