

# Privilege Cloud Deployment and Administration

**Duration: 4 Days**

## Course Description

This Course provides participants with the knowledge and skills required to deploy, administer, monitor, and troubleshoot a new implementation. It offers extensive hands-on experience through a step-by-step exercise guide and a dedicated lab environment. Participants will explore the solution's architecture, Identity Administration, credential vaulting and rotation, secure access to infrastructure assets, and more.

## Target Audience:

- New Privilege Cloud Administrators that may or may not be familiar with PAM ideology in general.

## Prerequisite:

- Basic networking knowledge
- Basic Windows administration knowledge
- Basic Linux knowledge

## Course Outlines:

- Describe the unique system architecture of the solution.
- Deploy the relevant components
- Successfully onboard and manage passwords (Verification, Change, and Reconciliation)
- Onboard accounts using the various tools available (bulk upload, discovery, RestAPI)
- Enable secure access to infrastructure assets using Vaulted credentials
- Monitor session recordings and session commands audit
- Produce reports on activities
- Utilize the knowledge base and other available resources to resolve problems
