

Privileged Access Management (PAM) Administration

Duration: 4 Days

Course Description:

The CyberArk Privileged Access Management (PAM) Administration course covers CyberArk's Privilege On-premises Solution. CyberArk administrators or 'Vault Admins' gain extensive hands-on experience in administering the solution, using our step-by-step exercise guide and dedicated lab environment. This course provides the participant with the knowledge and skills required to administer, monitor, and troubleshoot an existing Privilege On-premises implementation. The course includes discussions on Privilege On-premises Architecture, Password Management, Session Management and Privileged Threat Analytics, along with software concepts including monitoring, and troubleshooting.

Target Audience:

- Individuals who will be responsible for the administration of the solution
- Anyone who is interested in learning about or will be required to perform initial configuration and set up of the CyberArk solution.

Prerequisites:

Technical

- A computer that is able to connect to the Internet as well as a browser that supports HTML 5
- Skytap Checker
- WebEx Checker
- Sales Force Checker

Knowledge

- Basic networking knowledge
- Basic Windows administration knowledge

Course Objectives:

- Describe the system architecture and flows
- Successfully manage passwords (verification, change, and reconciliation)
- On-board accounts using Automatic Accounts Discovery and the Password Upload Utility
