

Professional Scrum Product Backlog Management Skills™ (PSPBM)

Duration: 1 Day

Course Description:

In this course, you'll gain hands-on techniques to refine, order, and optimize your backlog. Through interactive lessons and practical exercises, you'll learn how to—clearly express the product goal and backlog priorities, use refinement techniques like decomposition & slicing, ensure transparency and alignment across stakeholders, and simplify complex backlogs to improve delivery and business value.

This training is perfect for Scrum Masters, Product Owners, and Agile practitioners who want to strengthen their backlog management skills. Complete the course, validate your knowledge, and earn the PSPBM certification to showcase your expertise in effective backlog management.

Target Audience:

- Product Owners
- Scrum Masters
- Product Managers
- Business Analysts
- Aspiring Product Owners

Course Objectives:

- Learn techniques to create, refine, and prioritize your Product Backlog
- Explore ways to make your backlog clear and transparent for your team
- Discover ways to communicate with stakeholders and understand their needs
- Capture and translate stakeholder expectations into well-defined backlog items
- Understand how data-driven decisions and continuous learning can give you a competitive edge
- Get insights on how AI can simplify backlog refinement, prioritization, and decision-making

Course Outlines:

- Introduction to the Course
- The Product Backlog
- Forming the Product Backlog
- Managing the product Backlog
- Collaborating with Your Team and Stakeholders
- Leveraging AI
