

Scaled Professional Scrum™ with Nexus Certification

Duration: 2 Days

Course Description:

The Scaled Professional Scrum (SPS) with Nexus course is an interactive workshop where participants engage in activities to acquire skills that can be utilized to address obstacles encountered when implementing Scrum at scale. During this two-day class, students collaborate in a Nexus to simulate and coordinate a scaled product development project. Throughout the course, real-life scenarios are presented to highlight typical challenges in scaling, and over fifty practices for overcoming these challenges are shared.

These practices draw upon existing knowledge of Scrum and Nexus and complementary techniques that have proven successful in assisting clients with scaling Scrum, as discovered by members of the Scrum.org Professional Scrum Trainer (PST) community.
